## *The reason for requesting voucher data*

Worldwide Easy View is a service that visualizes voucher data received from companies using digital tools, identifies exceptional transactions through various scenarios, and provides insights related to the monthly (annual) business performance and voucher management of domestic and overseas local corporations.

Voucher data and related materials are used as core data for Easy View reporting tasks.

Regardless of the system and scale, including the analysis of more than 10 million vouchers, the following information is provided as a graphics-focused dashboard

- Monthly operation status
- Monthly voucher status
- Comparison analysis of the same period of the previous year
- Examples of abnormal voucher
- Key management indicators (ratios, turnover rates, turnover days, etc.
- Detailed analysis of assets/liabilities/income statement items

※ The following document assumes the voucher analysis period to be the following period:

> Cumulative for the current month [Jan 1, 2025 ~ most recent closing month] / Previous year [Jan 1, 2024 ~ Dec 31, 2024]

If you have any questions regarding data extraction, please feel free to contact us.
